Hoofcount
STANDARD FOOTBATH

At up to 3m long, this wider, Custom made bath is manufactured and installed to sit snuggly within your exit race, ensuring that **EVERY** cow dips **EVERY** hoof twice **EVERY** time they step through the bath.

Each bath is fitted with hard wearing rubber flooring to maximise cow comfort.

Using a separate valve for flush and fill, the bath empties through a **FULL WIDTH** opening door, effectively cleans and refills within 3 minutes.

Simple and consistently reliable the **HOOFCOUNT** Footbath is effective and easy to run.

The Bath:

- Fully automatic with manual over-ride facility
- 2 chemical pumps as standard for alternative chemicals
- Full Marine grade, folded stainless steel construction to prevent chemical damage
- No electric pumps or unnecessary moving parts, reducing maintenance/servicing costs

Customer Testimonials...

"Since installing the HOOFCOUNT Footbath, foot condition has improved massively. Digital Dermatitis is a thing of the past. I should have bought one years ago"
R. Roberts, Bryn Coch, Flintshire
Standard Footbath and Hoofcount Race

"The Footbath works extremely well in tandem with the Robots with no intervention needed. We've seen a big reduction in Digital Dermatitis and we have put this down to the Footbath"
A.Wright, Reynolds Farm, Cheshire
2.25m bath off 3 Robots

"We installed a HOOFCOUNT Footbath on the exit of each of our 4 Robots and have no Dermatitis issues. The feet of our herd are healthier than before installing the Footbaths. In our experience, Automated Footbaths are essential on robotic milking systems."
5 baths on 4 Robots
B.Weatherup, Parkend Farm, Fife

"We had a 3m HOOFCOUNT Footbath on our old milking system and when we installed our current rotary and increased cow number significantly, we chose to install the 3.7m HOOFCOUNT footbath. We had seen huge reductions in Dermatitis and lameness whilst using the 3m bath and found the HOOFCOUNT system is reliable, effective and works well!"
D.Webster, Oakley Farming, Shrewsbury

Hoofcount

FOOTBATH FOR YOUR ROBOT SYSTEM

Hoof care should be a priority in any Robot barn.

Healthy cows make more frequent visits to a Robot system.

Used everyday the **HOOFCOUNT** system allows chemical rates to be kept to a minimum.

On a Robot Milking System, the cows may make several visits to the Robot in any 24 hour period and therefore rules out the need to use a longer bath.

A **HOOFCOUNT** Footbath can be made any length you require, with most farms requesting a bath between 2m-2.5m.

A HOOFCOUNT Bath can fit perfectly onto:

- Head to Head
- Individual

Hoofcount

EXCEL FOOTBATH

At 3.6m long and made slightly deeper than the Standard Hoofcount Bath, the **EXCEL BATH** allows 3 dips per hoof each time the cow passes through the bath.

This narrow bath holds less water and chemical – reducing running costs.

Empties, cleans and refills within 3 minutes.

Strong Stainless Steel side sheets keep any splash-back in the bath and ensure that **EVERY** cow dips **EVERY HOOF EVERY STEP.**

The **EXCEL BATH** can be fitted into any race and works in exactly the same way as the Standard Hoofcount Bath.

This is a perfect option for Rotary milking systems, rapid exit parlours and larger herd numbers.

Simple and consistently reliable the **HOOFCOUNT** Footbath is effective and easy to run.
